Part 2 — Language page (“Tips for French speakers”)

Text	Check	Correction / comment
Voici les points les plus importants pour les francophones qui apprennent l’anglais parlé.	☐ OK ☐ Fix	
Sounds to practise H (house, hello) and TH (think, the) /ɪ/ vs /iː/ (ship/sheep), /æ/ and /ʌ/ The puff of air in /p t k/ Pronounce final consonants Stress and rhythm Don’t stress the last syllable of every word — learn each word’s stress. Make small words weak (/ə/). Grammar and words No article for general ideas: Life is short depuis → present perfect + for/since False friends: actually, attend, library, sensible	☐ OK ☐ Fix	

Part 3 — Tips inside lessons (written in simple English)

#	Lesson	Tip	Check	Correction / comment

1	Consonant Sounds	French /p t k/ have no puff of air, so Canadians may hear pin as bin . French has no H sound (see the H lesson) and no TH (see the TH lesson). Good news: French already has /ʒ/ (je) and /ʃ/ (chat).	☐ OK ☐ Fix	
2	TH: think and this	French speakers often say “ze” for the and “sink” for think . Let your tongue come out between your teeth — you should be able to see it in a mirror.	☐ OK ☐ Fix	
3	W vs V	French has both /w/ (oui) and /v/ (vous), so this should be easy. Just remember: the letter w in English is always /w/ — never /v/ as in some French borrowed words.	☐ OK ☐ Fix	
4	English H and R	French has no H sound, so learners drop it (“’ello”, “’ouse”) — or add it where it doesn’t belong. Practise with a sigh: “haaa”. Remember the silent H in hour, honest, honour .	☐ OK ☐ Fix	
5	Final Consonants: bag / back	In French, final consonants are often silent. In English, they must be pronounced: cats , liked (“likt”), helped (“helpt”).	☐ OK ☐ Fix	
6	Short and Long Vowels: ship / sheep	French i (vite) is tense, like /i:/. English /ɪ/ does not exist in French, so ship and sheep can sound the same. Relax your mouth and make /ɪ/ short.	☐ OK ☐ Fix	
7	cat / cut / bet	/æ/ (cat) and /ʌ/ (cut) are new. /æ/ often comes out like French a or è . Open your jaw more.	☐ OK ☐ Fix	
8	Word Stress	French puts the stress at the end of a word group, so learners often stress the last syllable of English words: “compu TER ”, “deve LOP ”. English stress can be anywhere — learn it with each word: com PU ter, de VEL op.	☐ OK ☐ Fix	
9	Rhythm: English Keeps the Beat	French is syllable-timed — every syllable about the same length. English is stress-timed: strong syllables are long, small words are very short.	☐ OK ☐ Fix	
10	Articles: a, an, the — or nothing	French uses an article for general ideas; English doesn’t: J’aime le café → I like coffee ; La vie est belle → Life is beautiful .	☐ OK ☐ Fix	
11	Present: Simple vs Continuous	The French present covers both I work and I’m working . In English, choose: habit → I work ; right now → I’m working .	☐ OK ☐ Fix	
12	Present Perfect vs Past Simple	French depuis + present → English present perfect: J’habite ici depuis deux ans = I’ve lived here for two years (not “I live here since two years”).	☐ OK ☐ Fix	
13	Words That Go Together	False friends: actually = en fait (not “actuellement” = currently); attend = assister à (assist = aider); library = bibliothèque (librairie = bookstore); sensible = raisonnable. Also: “I have 30 years” → I’m 30 ; “make a party” → have a party .	☐ OK ☐ Fix	

14	What Makes Canadian English Canadian	Canadian English has many words from French: toque , dépanneur , poutine , cabane à sucre . Careful: in English, toque means a winter hat — not a chef’s hat.	☐ OK ☐ Fix
